

11<sup>th</sup> November 2013

Hi everyone.....

The future of the Adventura 27FLB is very strong. Orders are rolling in! As we speak, two more units are in production for their lucky owners. Very early next year, the factory will start the next batch of 27FLB's.

Kevin, the proud owner of the latest 27FLB is settling into his new home.

Kevin has also added an annex onto his 27FLB, made by a local company, Willie Warne's Canvas Creations.

The quality of the annex is impressive, and we are very happy to use Willie Warne's Canvas Creations for all our annex work in the future.

Unit 4-3 Three Chain Road, South Lismore NSW 2480

Unit 4-3 Three Chain Road, South Lismore NSW 2480

I have been doing a lot of testing on the three different types of jacks.

My original design has been chosen for the following reasons:

- The Jacks will lift the wheels off the ground;
- They can be used manually or electrically using the 12v battery;
- They have side support to reduce side sways;
- A Control Box has been added , with four switches to control each jack;
- The Control Box is on a lead, which allows you to walk around and view the RV while adjusting the height. Leveling an RV has never been easier!
